

# FIGHT ZOMBIE BOTNETS

A zombie machine is one which has been infected by malicious software. A botnet or zombie army is a network of compromised computers. Zombie botnets are used for criminal activities, including identity theft and distribution of illegal material.

Make sure the computer you are using has up-to-date anti-virus software installed.  
Be careful what you download and install. Don't open suspicious attachments.  
When using a public computer, don't save your password on that machine.

.....  
For more information on protecting yourself against zombie botnets
